Summary

Early-career data analyst who also builds generative-AI tools for working with data. Cleans tables in Python (pandas) and checks the same figures in SQL (SQLite), then writes what the numbers mean. Generative AI work is a retrieval-augmented generation (RAG) app that answers questions over PDFs with page citations, and a LangGraph assistant that answers questions about one CSV using pandas and DuckDB. Holds an MTech in Computer Science and Engineering from Osmania University.

Skills

Python, SQL, SQLite, pandas, NumPy, Excel, matplotlib, seaborn, Jupyter Notebook, exploratory data analysis (EDA), scikit-learn, Power BI

RAG, LLMs, LangChain, LangGraph, Chroma, Hugging Face embeddings (all-MiniLM-L6-v2), BM25, Groq, DuckDB, Plotly, Streamlit, FastAPI, pytest, pdfplumber, Tesseract OCR

Projects

RAG Document Q&A with Citations

https://github.com/MacAns-117/Projects/tree/main/GenAi_Projects/Rag_Document_QA

- Built a multi-PDF question-answering app that chunks text, embeds it with all-MiniLM-L6-v2 into Chroma, retrieves with hybrid BM25 plus vector search, and has a Groq LLM answer with filename and page citations. Scanned pages fall back to Tesseract OCR. Streamlit UI and a FastAPI wrapper.
- Measured retrieval on a 24-question gold set (22 in scope) over two public arXiv papers. Hybrid search Hit@8 was 77.3% (17/22), versus 68.2% for MMR and 59.1% for cosine only. Hit@8 means the gold page is in the top 8 chunks, not that the generated sentence is correct.

CSV Insights Assistant (LangGraph)

https://github.com/MacAns-117/Projects/tree/main/GenAi_Projects/CSV_Insights_Assistant

- Built a LangGraph assistant that routes a question to data, visualization, or both, runs pandas tools and read-only DuckDB SQL on one loaded CSV, and shows Plotly charts in Streamlit. A schema card is taken from the file so the prompt is not tied to one table.
- On the default sample, cleaning left 87,230 rows (from 119,390). A pandas gold check passed 19/19. That check does not call the LLM.

Social Buzz Content Popularity (Accenture / Forage)

https://github.com/MacAns-117/Projects/tree/main/Data_Analytics_Projects/Accenture_Data_analytics_and_Visualization

- Ranked content categories by summed reaction scores, not reaction counts, for 18 Jun 2020–18 Jun 2021 (962 posts, 22,534 reactions, total score 893,482, 16 categories). Animals ranked first (score 68,624).
- The same top five came from pandas and from SQLite. Those five hold 36.0% of the score. Practice project for the Forage virtual experience, not a client job.

Play Store Apps — 14 SQL Questions

https://github.com/MacAns-117/Projects/tree/main/Data_Analytics_Projects/Playstore%20Apps%20Analysis%20%26%20Visualization

- Cleaned a Google Play dump to 9,648 apps and answered 14 assigned questions in pandas and in SQLite. Left 1,458 missing ratings blank instead of filling them with the mean.
- Treated install counts as bucket floors. Paid revenue is price times the install floor, not the store's actual take.

Operations Analytics and an August Engagement Drop

https://github.com/MacAns-117/Projects/tree/main/Data_Analytics_Projects/Operations_Analytics_And_Investigating_Metric_Spike

- Traced weekly engagement from 1 May to 31 Aug 2014 in pandas and SQLite: 19,066 accounts, peak 1,443 engaged users (week of 28 Jul), then 1,194 in the week of 25 Aug (17.3% under the peak). Phone fell 25% and tablet 35%, computer 9%.
- Email open rate stayed about 33–35% while click-through fell from 16.1% to 10.8% (week of 4 Aug).

Experience

Software Engineer — Aptsol Global Tech Pvt Ltd

Apr 2024 – Oct 2024

- Wrote and maintained client project code in Python, SQL, HTML, and CSS/Bootstrap, including Python profiling and SQL tuning, on a stated 5-person team.

Data Engineer Trainee — MedTourEasy

Nov 2023 (4-week traineeship)

- Cleaned structured records and ran SQL analytics for a chemical-components analysis.

Data Analytics Trainee — Trainity

Jul 2023 – Sep 2023

- Training in Python, SQL, Power BI, and exploratory analysis. Capstone stated as Play Store apps analysis and visualization.

Education

MTech, Computer Science and Engineering — Osmania University — Sep 2019 – Sep 2022

BE, Information Technology — Osmania University — Aug 2015 – May 2019

Certifications

- IBM Data Science (Coursera / IBM)
- Accenture Data Analytics and Visualization Virtual Experience (Forage)
- PwC Power BI Virtual Experience Program (Forage)
- Brainnest Data Analysis Industry Training
- Data Science and Machine Learning Internship Program (Gilbert Research Center)
- Play Store Apps Analysis and Visualization, online live project (HiCounselor)
